

False alarms at the Dice-optimal validation threshold, change from IXI (pp)

Pooled Dice at 10% test false alarms, change from IXI (pp)

..... IXI model

--- BraTS healthy slices (in-domain)

● IXI model fine-tuned 10 more epochs

Points: test-set difference; bars: 95% paired bootstrap interval over test subjects. 0 local subjects = the same extra training on IXI only.
